# Engineering News-Record index

CONTENT

**Part I—Subject Index**

The index includes all articles that have appeared within the dates covered, with the exception of certain Briefs (such as Labor Briefs, Careers) and Obituaries.

The subject headings under which all articles are indexed appear in alphabetical order. Within the subject headings the entries are listed chronologically.

Many important headings are divided into subheadings, for example, BRIDGES—by states or countries; CITIES—by name; BUILDINGS—by type (churches, garages, etc.).

International coverage is shown under the letter "I." The items here listed geographically also appear under the appropriate subject headings.

**Part II—Names**

Part II of the index contains names of authors, personalities, and companies. Listed here are the names of people who are the subject of articles; names of authors of by-lined articles and published letters; and names of firms about which articles were written.

Individuals or firms simply mentioned in feature articles about various construction projects are seldom indexed by name. Those, on the other hand, who are listed under **Names** will usually not appear under the subject heading. For example, an article about the Smith Construction Co. appears only in the **Names** section and will not be found under the heading CONTRACTORS.

**Part III—Product Manufacturers**

Items that describe new materials and equipment, including Product Briefs, are indexed under this heading, by manufacturer's name.

TERMS USED

**See** means that all entries on the subject will be found under another heading: EXCAVATING, **see:** SOIL.

**See also** means that a related heading should also be checked: SEWAGE, **see also**: WATER POLLUTION.

The following abbreviations and signs are used:

RC —Reader Comment
CW —Construction Week
WO —Washington Observer
B —Brief and Around the World

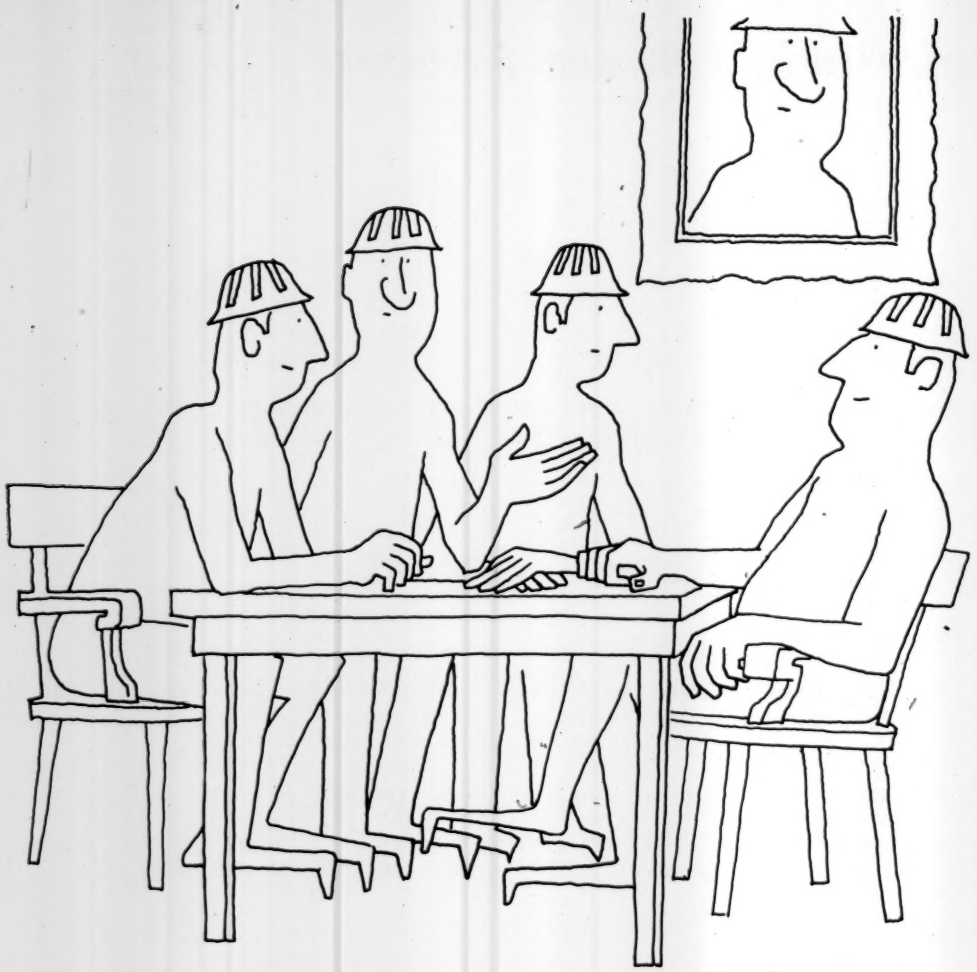
ENGINEERING NEWS RECORD is published every Thursday. There are 25 or 26 issues in each half-yearly volume, covering January to June and July to December, starting with vol. 78 in 1917, when ENGINEERING NEWS and ENGINEERING RECORD joined forces under the present title.



# Talk to Construction where Construction talks to itself

Whenever Construction's leaders want to talk and listen to themselves on an industry-wide basis they do it in Engineering News-Record.

Over 113,000 of them subscribe to this only national construction newsweekly—invest some $850,000 a year in new and renewal subscriptions. *And they invest $750,000 or more a year in this magazine's classified advertising pages: far more than they invest in the classified pages of all other construction publications combined.*

Here they ask each other for jobs, offer each other jobs, sell machinery and equipment to each other, tell each other about the services they offer.

And the only way you can make advertising pay off is to have it listened to by the people you most want to sell. The best way to do this is to "join the buying group." Let your advertising talk and be understood where your customers and prospects talk and listen to themselves.

Although we have a Marketer's Guide that will give you 40 pages of reasons why Engineering News-Record is *your* best advertising medium in the construction market,* we'll content ourselves here with just this one:

Construction's buyers, themselves, long ago chose ENR as their industry's best communications medium. They pay far more to read ENR than they pay for any other national construction publication. And when they want to advertise, themselves, they scarcely consider any other publication.

*We will be pleased to send you a copy of "Keeping Pace With Opportunity in the Worldwide Construction Market." Advertisers have told us they consider it the most valuable Marketer's Guide any construction publication has yet produced.
